PRESS RELEASE
Calgary, AB – January 4th, 2018

BLACKFOOT MOTOSPORTS UNVEILS CUSTOM MOTORCYCLES AT CALGARY MOTORCYCLE SHOW

Blackfoot Motosports will be unveiling two custom Triumph motorcycles at the Calgary Motorcycle Show in 2018 in which one will be a Street Tracker based on a 2006 Triumph Scrambler and the second one based on a 2017 Triumph Bonneville.

With the current market trend of customers wanting to portray their own identity through the many avenues of customization of their motorcycles, Blackfoot Motosports will be making available a large array of options and or modifications to meet these needs.

Blackfoot has always had a passion for building race bikes right from the early years through to the National race teams for both Motocross and Road Racing however with the retirement of the teams we felt that we had the knowledge and experience to enter the custom bike building market.

All the parts and accessories as well as the custom engines will be available to our customers who are looking to make their bike an expression of their riding genre and their personality.

In addition, many of the modifications that are done to these two special custom Triumphs or any customer's requirements can be applied and quoted on as well.

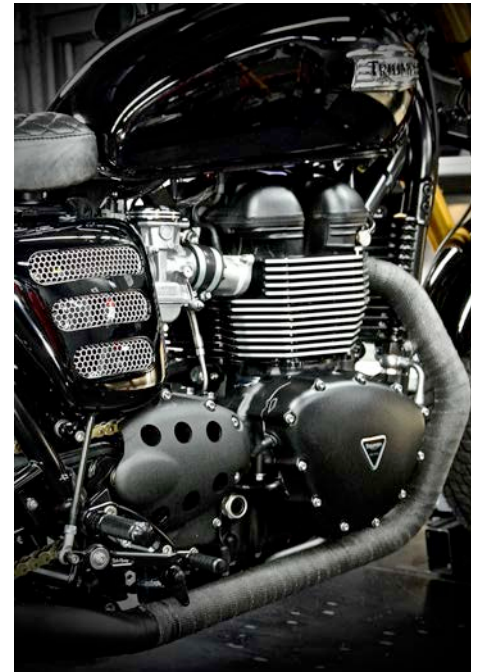

If a customer is looking to build a custom bike from the ground up as a project motorcycle we would be pleased to put together a package that could be based on engine performance, suspension and drive-train, custom modifications including paint or whatever we can assist with to ensure the end result is a reliable custom motorcycle that they can enjoy for many years.

ONE TEAM · ONE PLAN · ONE GOAL
CUSTOMER SATISFACTION

We look forward to having motorcyclists come by our booth at the Calgary Motorcycle show where both motorcycles will be on display. As well as our staff will be on hand to discuss and answer any questions customers may have about a custom build.
